L	LARGE	16½	18½	16	18½
LT	LARGE-TALL	16½	19½	16	19½
XL	X-LARGE	17½	18½	17	18½

HALF CHAPS MEASUREMENT GUIDE

- Sit in a straight chair with your knees bent at 90 degrees to the floor.
- Wear the breeches and socks that you would most likely wear with your half chaps.
- Have someone else measure your calves, if possible.

A. To determine calf width:
Measure the calf width at the widest part of the calf.

B. To determine calf height:
Measure leg height from the floor to the bend behind the knee.

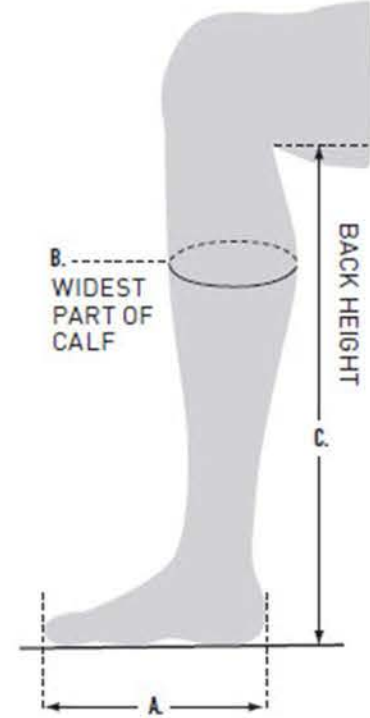

*On initial fitting, chaps should fit snug and will give over time. Depending on materials and construction, fit may vary slightly across styles.

*Monaco™ chaps are designed to provide a tall, elegant fit. They will fit quite high across the back of the knee on the initial fitting. Due to the very soft and supple materials used they may tend to drop slightly more than other chaps. For a more comfortable fit without as much contact across the back of the knee, please size down.

TALL BOOTS MEASUREMENT GUIDE

- Sit in a straight chair with your knees bent at 90 degrees to the floor.
- Wear the breeches and socks that you would most likely wear with your tall boots.
- Have someone else measure your calves, if possible:
 - A.** Measure foot for shoe size.
 - B.** To determine calf width: Measure the calf width at the widest part of the calf.
 - C.** To determine calf height: Measure leg height from the floor to the bend behind the knee.
 - Add approximately ½" - ¾" to allow for drop.
 - Approximate drop allowance is built into the chart height measurements so make sure you add drop to your leg measurement. Non-zip styles will drop more than zip styles.

MEN'S TALL BOOTS (USA & UK)
